DUMMER ACADEMY.

ONE HUNDRED FORTY-SEVENTH YEAR.
1909-1910.

IT IS the endeavor of this school to discover the possibilities of each student and to so train him that he may realize these possibilities if he will; to lead him to assume his proper responsibilities, to render service and to seek happiness in establishing and maintaining right relations with his environment.

THIS BOOKLET is intended to answer briefly some of the first questions asked by those who are interested in finding *the* school for a particular boy.

FOR AN illustrated catalogue or further information, address,

DUMMER ACADEMY is thirty-five miles from Boston in a northerly direction. Trains on the Eastern Division of the Boston & Maine Railroad to Ipswich or Newburyport are the more convenient for passengers with hand baggage. Passengers with heavy baggage may reach the school by taking trains on the Western Division of the Boston & Maine, to Byfield. Electric cars run directly to the school, once an hour, from

the three stations mentioned above. Cars leave Ipswich (6 m.) and Newburyport (5 m.) on the half hour, and reach the school in twenty-five minutes; leave Byfield at twenty minutes before the hour, connecting with the other cars. All freight and express matter should be billed to Byfield.

Telegrams should be addressed "Dummer Academy, Newburyport, Mass." To reach the Principal by telephone, call 161-5 Newburyport. All other calls, 9002-4 Newburyport.

THE SCHOOL.

BY THE GIFT of his estate comprising 330 acres of land in Newbury with his country house and farm buildings, Lieutenant Governor William Dummer laid the foundation for the Academy which bears his name. The school was opened in 1763 and incorporated in 1782. It is the oldest school of its kind in the country.

THE STUDY of the lives and achievements of the famous men who have gone forth from this school in the past is of itself an important educational factor, appealing strongly to the boy's imagination as he realizes that he is on the same ground and amid the same scenes that these great men once were.

THE LOCATION is all that can be desired for a school, away from the excitements and temptations of large towns, in a beautiful part of historic Newbury, between two rivers suitable for bathing, boating and canoeing, but five miles from the ocean and a few hours from the Maine coast or the mountains.

WHILE THE school is ancient, its equipment is modern and up-to-date. The buildings are

heated by steam and hot air, the drainage is of the best, the lighting is by electricity.

ALL THE water used about the place comes from a large spring upon a hillside an eighth of a mile distant; as shown by state analysis, the water is perfectly pure.

THE RECITATION hall is separate from the dormitories. The latter furnish accommodations for about fifty boys and seven masters. All take their meals in "Commons," which has the best and newest cooking, storing and refrigerating arrangements.

THE CENTRE of the social life at the Academy is the "Commons" hall, a large room with open fireplaces, a piano for the use of the boys, tables with games, books, magazines and newspapers.

IN RELIGIOUS matters the school is strong but non-sectarian. Each session of the school is opened by simple exercises and on Sunday the boys attend the Byfield Parish (Congregational) church, or some other church selected by their parents.

A CLASS for Bible study is conducted by the master on Sunday evening, or the exercises of the day close with a short song service.

EXPENSES.

THE COST of tuition and board is \$600.00 a year; this includes the occupancy of a single room. When a room is shared by two boys the charge is \$550.00 each.

DAY PUPILS pay \$100.00 a year tuition.

A FEW scholarships are available for needy students of ability. There are also opportunities for self-help.

BOOKS, STATIONERY and laundry work are provided at list rates. Day pupils may take luncheon at the Commons at \$1.50 per week. A laboratory fee of \$5.00 is charged those taking courses in physics or chemistry.

A DEPOSIT of \$25 is required at registration to cover breakage or loss. The balance is returned at graduation.

BILLS OF tuition are invariably due as follows: One-half at the beginning of the first term, one-quarter at the beginning of the second term, one-quarter at the beginning of the third term.

EACH BOY should bring four sheets for a single bed, six pillow slips, a dozen towels, six napkins, napkin ring, one pair blankets, one clothes bag, all marked with his initials. The school will purchase these things for the student on proper authorization or will furnish these articles for the student's use at \$10.00 per year.

IT is essential to bring suitable clothing and footwear for outdoor life in all weathers, a sweater and gymnasium suit.

AN ANNUAL subscription of \$10.00 for athletics will be asked from parents who are willing to help in this department.

ATHLETICS.

A SOUND PHYSICAL basis is requisite for healthful mental development. Therefore, athletics as recreation and pastime are encouraged, and special attention is given to the building of the body. Students are required to submit to a thorough physical examination by the school physician, who will prescribe the proper exercise to be taken.

THE GYMNASIUM has a basket ball floor 60 x 30, the usual apparatus, lockers and shower baths.

THE FOOTBALL and baseball fields are conveniently located. The diamond is skinned and ballasted.

TENNIS COURTS, handball courts, and a pond for skating are all close at hand on the school property.

PUPILS ARE not permitted to keep driving horses, but arrangements can be made to keep saddle horses or ponies at the Academy farm.

AS THERE is game to be found in season on marsh and river, permission may be obtained by

the older boys to keep and use shot guns. This does not apply to pistols and rifles.

IN FOOTBALL, baseball and basket ball the interest is very keen and strong teams are the result.

THE OPEN, rolling fields in the vicinity of the Academy furnish ideal opportunities for cross-country running.

BOYS ARE encouraged to bring their canoes or boats, as the Parker and Mill rivers, which are close by, afford excellent facilities for boating.

THE ATHLETICS of the school are in general controlled by the Athletic Association, which is an organization of the boys with two faculty members.

ADMISSION.

STUDENTS are admitted to any class for which they are qualified as shown by certificates or examination.

No BOY will be admitted who does not present letters of recommendation from former teachers.

BOYS ARE entered for the whole school year unless by agreement made beforehand in writing, but no boy will be retained in the school whose removal, either permanent or temporary, is believed to be for his best interest or that of the school.

APPLICANTS FOR the Junior class are examined in Arithmetic, English, Grammar and Geography.

BOYS ARE received into the Preparatory class without examination. Written examinations are held once a month and reports of standing sent to parents or guardian.

No STUDENT is allowed to remain at the Academy during the regular vacations, except by special arrangement made beforehand with the Treasurer or the Master.

COURSES OF STUDY.

THE EDUCATIONAL work of the Academy is thorough, systematic, and progressive. Although its studies are planned to fit pupils for entrance to colleges and technical schools, yet it also offers an exceptionally complete course for those who have no further schooling in view.

PUPILS OF advanced age are given every incentive and aid to make up work, and to complete the course in less time than usual. The Academy offers to pupils a regular four years' course of study, which is carefully planned to meet the requirements for admission to all colleges and scientific schools.

SHOULD A pupil require more time in which to complete his preparations, he may take a five years' course. For boys too young to enter upon the regular academic work, a two years' preparatory course is arranged which is designed to qualify them to pursue the subjects of the junior year.

THE COURSE of study should be taken in the regular order as prescribed, but it is so flexible that any group of subjects may be elected to

meet the needs of the student who requires a special course.

THE NUMERALS in parentheses indicate the number of recitation hours a week devoted to each subject.

The following points deserve especial mention :

In English and History, considerable amounts of outside reading are required each month.

Themes are usually corrected before and partially by the whole class, so that all profit by the mistakes of each.

On account of small classes every student is *obliged* to take part in oral discussions, thus gaining power of rapid thought and accurate spontaneous expression.

Every exercise is an exercise in English regardless of subject.

SPELLING three times per week is a required exercise for the whole school.

THE HOURS in classroom are fifty-minute periods, and where the number of periods per week is smaller than is customary it is so because in classes of ten or less the full amount of work can be done easily in the time given.

THE LENGTH of the periods in the preparatory years is adapted to the needs of the students.

INSTRUCTION IN special branches, such as vocal or instrumental music, dancing, boxing

and fencing, may be had by special arrangement.

As an essential help to the preparation of lessons a regular study period of two hours a day under the supervision of an instructor is prescribed. Certain privileges are granted those who attain high rank.

A FEW UNSOLICITED OPINIONS FROM PARENTS.

"My Dear Dr. Ingham:

I am very happy over the final outcome of
.....'s year at Dummer, and I thank you
exceedingly for the personal interest which I
think won the day."

"Robert writes most enthusiastically regard-
ing the school, which of course pleases me very
much. I am much pleased with Robert's
work and with his deportment at Dummer, and
shall take pleasure in recommending the school
to my friends."

"I cannot begin to express my gratitude to
you for your great kindness to and sympathy for
Henry, of which he speaks so appreciatively."

"I have a son 16 years old we are desirous of
fitting for Yale. We wish to put him in a small

private school where he can get more instruction than could be given him in a large one. Your school has been highly recommended to me as a 'thorough educator'."

August 10, 1908.

"My heart is set on the boys going to your school. While, as I stated in my last communication, there are several academies which have offered to take them at a price within my reach, I willingly fall in with your suggestion to wait a week or two with the hope that satisfactory arrangements can be made."

August 19, 1908.

"I am very much indebted to you for your great kindness in securing for my boys the scholarship of \$300 each."
